**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups 1-102, claim(s) 1-17 and 52-55, drawn to a combination product for the treatment of cancer comprising an antisense oligonucleotide complementary to a ribonucleotides reductase R2 subunit mRNA and an immunotherapeutic agent, wherein the antisense oligonucleotide is selected from SEQ ID NOs:1 and 4-104. Note that each inventive group is directed to a specific SEQ ID NO. For example, group 1 is directed to SEQ ID NO:1, while group 102 is directed to SEQ ID NO:104. Hence, applicant is required to specifically elect a single disclosed SEQ ID NO in the reply.

Groups 103-204, claim(s) 18-34, drawn to a method of treating cancer in a mammal comprising administering a combination product for the treatment of cancer comprising an antisense oligonucleotide complementary to a ribonucleotides reductase R2 subunit mRNA and an immunotherapeutic agent, wherein the antisense oligonucleotide is selected from SEQ ID NOs:1 and 4-104. Note that each inventive group is directed to a specific SEQ ID NO. For example, group 103 is directed to SEQ ID NO:1, while group 204 is directed to SEQ ID NO:104. Hence, applicant is required to specifically point out a single disclosed SEQ ID NO in the reply.

The inventions listed as Groups 1-204 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The inventions of groups 1-204 are found to have no special technical feature that defines a contribution over the prior art of Lee et al. (*Cancer Research*, 2003, 63:2802-2811).

The first claimed invention in the instant case is a combination product comprising an antisense oligonucleotide complementary to a ribonucleotides reductase R2 subunit mRNA and an immunotherapeutic agent for cancer treatment, wherein the antisense oligonucleotide is SEQ ID NO:1. Lee et al. teach an antisense oligonucleotide complementary to a ribonucleotides reductase R2 subunit mRNA ("GTI-2040") for cancer treatment wherein the antisense oligonucleotide is identical in sequence to the instantly claimed SEQ ID NO:1. Furthermore, Lee et al. teach that SEQ ID NO:1 also functions in immune stimulation for its overall antitumor efficacy and suggest a combination product comprising SEQ ID NO:1 and other chemotherapeutic agents. Therefore, applicant's invention does not contribute a special technical feature when viewed over the prior art of Lee et al. Accordingly, the inventions of groups 1-204 do not have a single inventive concept and so lack unity of invention, and therefore the restriction for examination purpose as indicated is proper.

#### ***Notice of Rejoinder***

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully

examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANA SHIN whose telephone number is (571)272-8008. The examiner can normally be reached on Monday through Friday, 7am-3:30pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James (Doug) Schultz can be reached on 571-272-0763. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
